Thanks Scott - I got that once you clarified it on the call, but I appreciate the follow-up. Thanks.

Yes, we're asking for past (for this last year) and future (for next year) records. Any thoughts about how to frame the request you could offer?

Hope you have a happy 4th!

Jae

FYI, and regarding my comments near the end of today's call, I wasn't meaning to pull back on EPA's desire to look at this issue comprehensively, including obtaining data on aerial spray drift at some point (when we know how to do that defensibly and have the funds), but I was trying to make the point that we should be moving full speed ahead on the short-term sampling effort. This will be important data and we seem to have resources to make it happen. I spoke with Dale later to clarify that. Also, is the letter you're preparing to request application records for future or past spray events or both?
